# CERTIFICATIONS

Sika Footwear's work footwear is certified according to the European standards for safety footwear (EN ISO 20345:2011) and work footwear (EN ISO 20347:2012). In 2022, new, official certifications in both categories were issued. Both approvals will be valid in a transitional phase.

## Safety Footwear: EN ISO 20345:2011

Footwear certified in accordance with EN ISO 20345:2011 as a minimum has a toe cap, which protects against falling objects of 200J impact and against a compression load of at least 15kN. This basic certification is also known as SB . Additionally, further protection can be added to the footwear. The most common combinations are:

CERTIFICATIONS	SAFETY FOOTWEAR				WATERPROOF BOOTS

## Safety Footwear: EN ISO 20345:2022

Footwear certified in accordance with EN ISO 20345:2022, has, at minimum, a toe cap to protect from falling objects at 200J and compression (15kN). This basic certification is still known as SB . Additional protection can also be added to the footwear. The most common combinations are:

## Work Footwear: EN ISO 20347:2012

Footwear approved in accordance with EN ISO 20347:2012 does not have a toe cap and are intended for occupational use. This basic certification is known as OB . Additionally, further protection can be added to the footwear. The most common combinations are:

-  = OB + A + E
-  = OB + A + E + WRU
-  = OB + A + E + WRU (only applies to waterproof boots)

## Work Footwear: EN ISO 20347:2022

The difference that applies to Sika Footwear between the new and the old certification is the addition of the O6 certification

-  = OB + A + E + WR

## Certifications for the sole's slip resistant properties 20345:2011 and 20347:2012

-  The outsole is slip-tested on ceramic tiles with soap solution
-  The outsole is slip-tested on steel plates smeared with glycerine
-  The outsole is slip-tested for SRA and SRB

## Certifications for the sole's slip resistant properties 20345:2022 and 20347:2022

In the new standard, the SRA test is mandatory when it comes to the anti-slip properties of the sole. The new SR certification is optional and is obtained if the sole passes the test.

-  The outsole is skid tested on ceramic tile with a glycerin solution.
